Caught Later By Behavioral Blocking, Firewall, Etc.:

- **Unthreat detected 2 missed link 1 and 4. Hitmanpro found 1 Trojan, 1 worm, and a suspicious file. Malwarebytes found 1 Trojan and 2 rogue. PowerPC**

Malware Pack Containing 667 Files (4 to 5 Day Old Files):

- **663/667 = 99.40%**

5 Star Rating:

- **1 Star: User-friendly: 1/1 Star**
- **1 Star: Low Ram Usage: 1/1 Star**
- **1 Star: 48/60 Web Links: 1/1 Star**
- **1 Star: Detection 85%+:   1/1 Star**
- **1 Star: Behavioral Blocking: 1/1 Star**

                                        5/5 Stars

Summary:

Advantages:

- **It has no system slow down, with very low ram usage!**
- **It has a nice simple user interface**
- **Amazing on detecting 663 out of 667 even if old files!**
- **Behavioral Blocking is decent**
- **It's basically like vipre, except with working behavioral blocking**

Disadvantages:

- **There's no scan timing to let you know when it's going to be done!**
- **Cleaning files that were detected was slow!**

I still would rather get vipre because KillSwitch is saying that unthreat is potentially unwanted and I did hear a lot from people that unthreat is risky to get. If im wrong, please let me know. Other than that, Unthreat did well. I won't recommend this product yet until I get more information to see if its

"potentially unwanted," once I get info that unthreat is safe, then I will post a comment recommending it!

Thanks for reading!
