Caught Later By Behavioral Blocking, Firewall, Etc.:

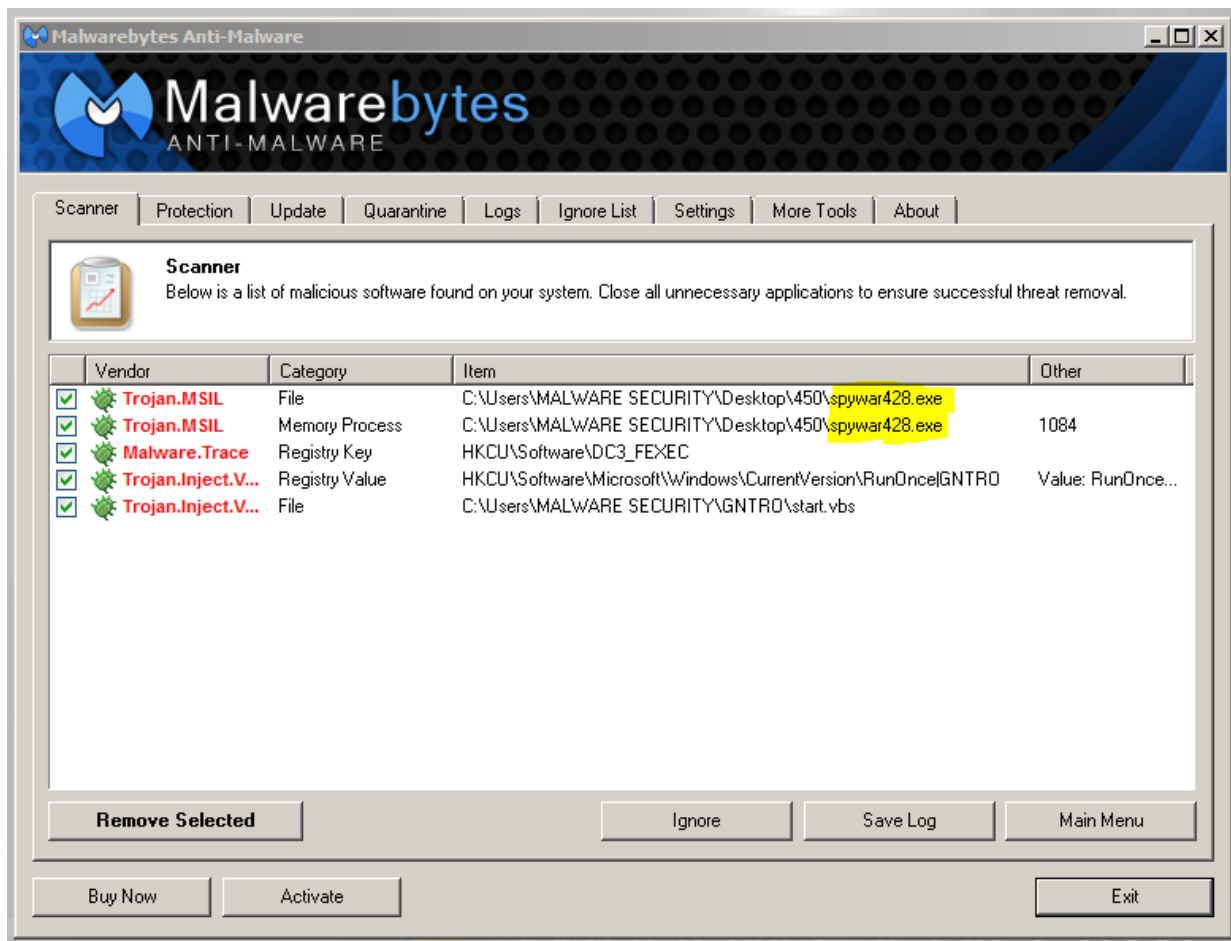

- Since it blocked all the web links, I'm going to test the behavioral blocking from the missed malware files in the 450 files in malware pack.
- I ran 12 files and it detected 8 out of 12 files, which is good!

I ran a quick scan with McAfee and it found nothing.

Malwarebytes and Hitmanpro found the 4 missed files that McAfee missed!

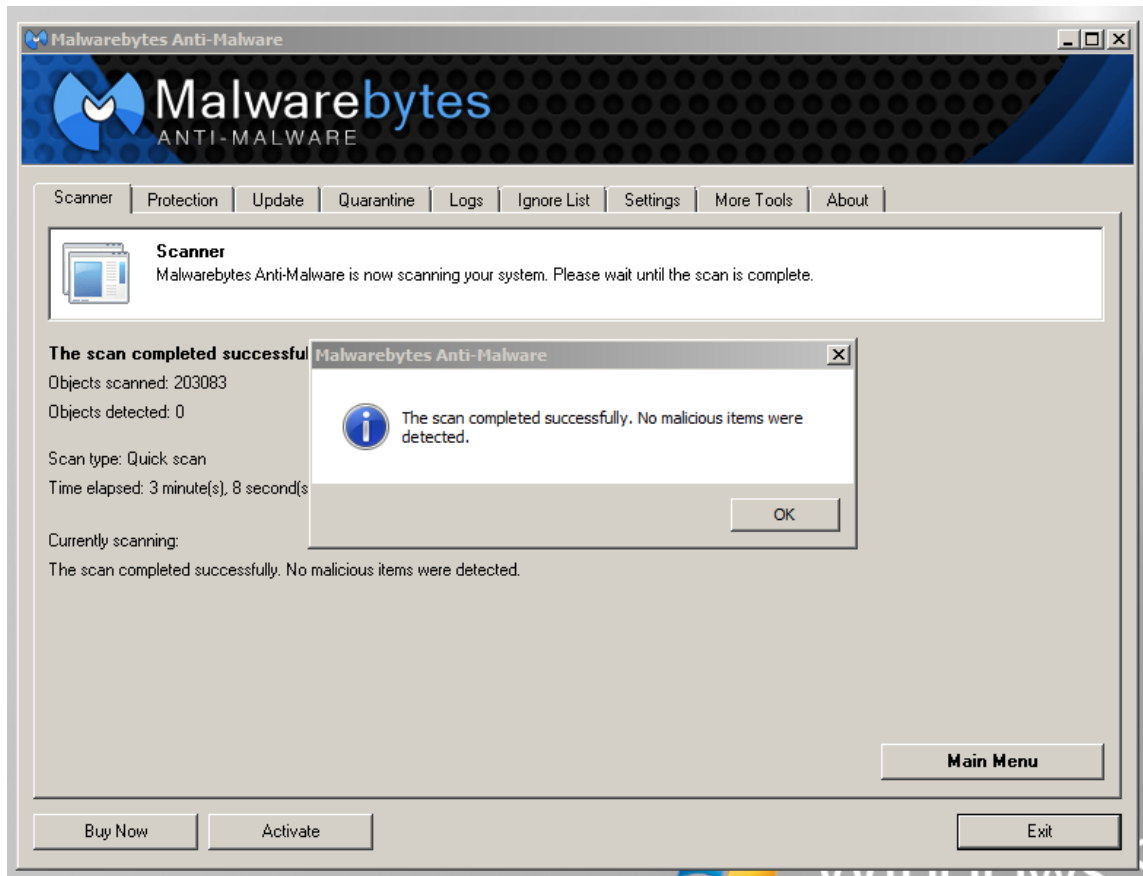

Hitmanpro and Malwarebytes results:

- Hitmanpro detected nothing from the 30 blocked links!

- **Malwarebytes detected nothing from the 30 blocked links!**

Malware Pack Containing 450 Files (1 Day Old Files):

- $350/450 = 77.78\%$

5 Star Rating:

- **1 Star: User-friendly:** **1/1 Star**
- **1 Star: Low Ram Usage, 60mb or less:** **0/1 Star**
- **1 Star: 24/30 Web Links, 80%:** **1/1 Star**
- **1 Star: Detection 85%+:** **0/1 Star**
- **1 Star: Behavioral Blocking, 50%+:** **1/1 Star**

3/5

Stars

Summary:

Advantages:

- **Easy user interface**
- **Amazing on web blocking**
- **Behavioral blocking seems to work!**

- **Quick scan on computer and custom scan on 450 files is really quick!**

Disadvantages:

- **Needs to improve a little bit on detection rate!**
- **High on ram usage!**

According to my testing's, McAfee has done amazing on web blocking, but still needs to improve a little bit on detection rate. They also need to cut down on ram usage to make it better for users who don't have that much ram left over. I would recommend this product to users because blocking the websites really good should not lead you to virus's and other junk.

Thanks for Reading!
