Caught Later By Behavioral Blocking, Firewall, Etc.:

4 Files were left on desktop. 1 had 0/47 detections from virus total, so that doesn't count. The second file had 15/37 Virus Total, but file was dead. The 3rd file had 25/47 detection from virus total, but was missed by outpost. The last file had 27/47 detection from virus total and that was detected by outpost.

So basically it detected 1 out of 2 files.

Hitmanpro and Malwarebytes results:

Malware Pack Containing 450 Files (2 Day Old Files):

- **130/450 = 28.89% (Poor Detection)**

5 Star Rating:

- | | |
|----------------------------------------|----------|
| • 1 Star: User-friendly: | 1/1 Star |
| • 1 Star: Low Ram Usage, 60mb or less: | 1/1 Star |
| • 1 Star: 24/30 Web Links, 80%: | 0/1 Star |
| • 1 Star: Detection 85%+: | 0/1 Star |
| • 1 Star: Behavioral Blocking, 50%+: | 1/1 Star |

3/5

Stars

Summary:

Advantages:

- Easy user interface
- Low on ram usage and not heavy on system
- Behavioral blocking seems to work.

Disadvantages:

- Horrible detection rate from 2 day old files
- Horrible on web blocking, needs to dramatically improve on detecting “malicious sites”
- Pretty slow on updating

According to my testing's, outpost did not do well on web blocking and detecting files. I would not recommend this antivirus to users unless they improve quickly on web blocking and detection rate.

Thanks for Reading!
