

# Norman Security Suite Pro 10 (Updated and Default Settings) Malware Security

## User Interface:

## System Memory:

- **18 Running Process**
- **197 Megabytes of ram**
- **Pretty heavy on system, but when updating Norman, it can slow the computer a lot!**

## 30 Web Links (Zero to 1 Day Old Links):

- 30/30 Links Blocked

Missed Links:

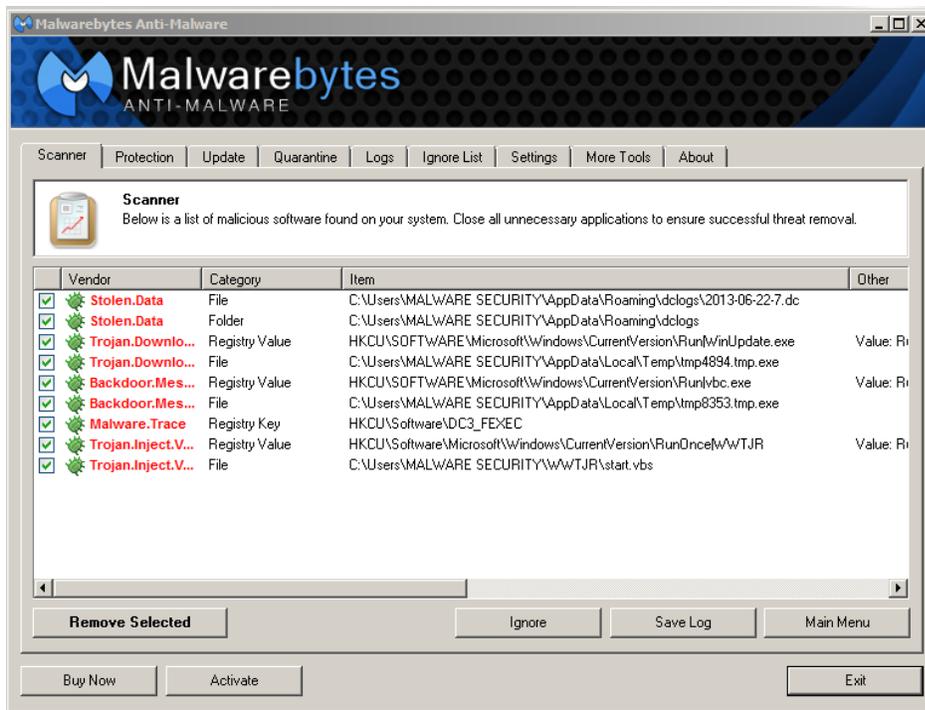

## Hitmanpro and Malwarebytes results:

- Scanned with hitmanpro and malwarebytes after 30 web links and behavioral blocking test, and malwarebytes found 8 things that came from 3 missed files from 2 out of 5 files it detected from malware pack!

## 5 Star Rating:

- **1 Star: User-friendly:** 1/1 Star
- **1 Star: Low Ram Usage, 60mb or less:** 0/1 Star
- **1 Star: 24/30 Web Links, 80%:** 1/1 Star
- **1 Star: Detection 85%+:** 1/1 Star
- **1 Star: Behavioral Blocking, 50%+:** 0/1 Star

3/5

Stars

## Summary:

### **Advantages:**

- **Amazing on web blocking!**
- **Nice and easy user interface**
- **Detection rate is good**

### **Disadvantages:**

- Heavy on ram
- Heavy on system
- Needs to improve a little on behavioral blocking!

According to my testing's, Norman did amazing in web blocking and pretty decent on malware pack. The biggest problem with Norman is the 18 running process and 197 megabytes of ram, that's unnecessary. I would recommend this product to users because the web blocking will prevent any kind of malware going into your computer, but if you have an old age computer or low ram like 2 megabytes and less, I would not recommend this antivirus to you since your computer will just keep freezing up, especially when your updating Norman.

Thanks for Reading!
