Hitmanpro and Malwarebytes results from missed files that I executed in malware pack:

- Hitmanpro detected 2 out of 3 missed files!

- Malwarebytes found the last file, it says it detected 50 Trojans, but it's all the same one missed file!
- I couldn't paste the results because snipping tool is not letting me copy!

5 Star Rating:

- | | |
|--|----------|
| • 1 Star: User-friendly: | 1/1 Star |
| • 1 Star: Low Ram Usage, 60mb or less: | 0/1 Star |
| • 1 Star: 24/30 Web Links, 80%: | 1/1 Star |
| • 1 Star: Detection 85%+: | 1/1 Star |
| • 1 Star: Behavioral Blocking, 50%+: | 0/1 Star |

3/5

Stars

Summary:

Advantages:

- Nice and easy User interface!
- Good on web Blocking
- Detection rate is good!
- I like there web blocking because it won't let the user pass the malicious website unless you disable some features which will be dumb if you do!

Disadvantages:

- Heavy on ram
- When scanning files, it doesn't let you know when it's going to be finished!
- Behavioral blocking needs work!

According to my testing's, it did a good job considering that behavioral blocking doesn't seem to do its job. It also needs to fix the part where its suppose to let you know when scanning is going to be done or its progress because I don't know if I have to wait hours. I would recommend this product because its web blocking and detection rate shouldn't let any malware go through.

Thanks for reading!
