## Summary:

### **Advantages:**

- Nice and easy user interface
- Scan and cleaning at the same time is pretty quick!
- Behavioral blocking seems to do its job

### **Disadvantages:**

- Needs better web blocking, like detecting phishing websites
- REALLY high ram usage
- Detection is awful
- Malwarebytes will not work with Preventon Antivirus, I had to uninstall preventon at the end for malwarebytes to work!

According to my testing's, Preventon needs to work hard and fix the disadvantages, they didn't do well on the important things like web blocking and detection. Another big issue is its ram usage, its crazy high. I would not recommend this antivirus until they get a newer version for me to test to see if they improved!

Thanks for reading!
