Malware Pack Containing 72 Files (1 Day Old Files):

68/72 Files detected = 94.44%
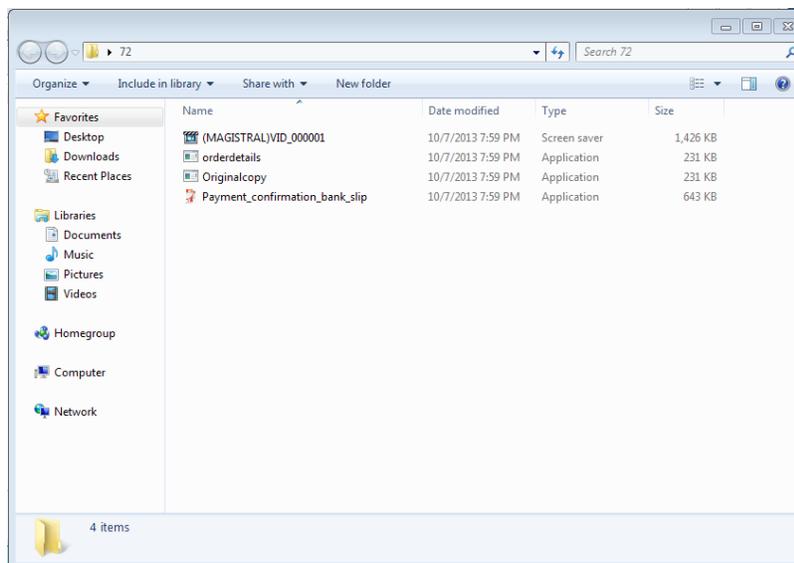

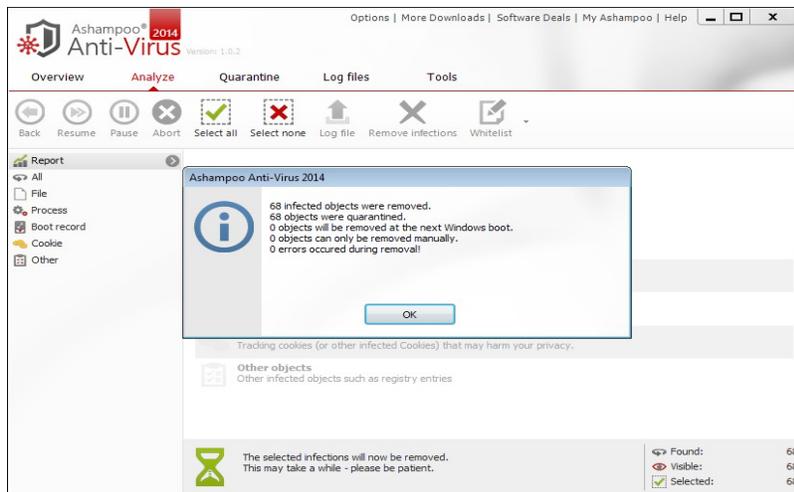

Caught Later By Behavioral Blocking, Firewall, Etc.:

- I executed the missed 4 files in malware pack and it detected 4 out of 4 files by behavioral blocker. I could not post a picture of behavioral blocking log because it doesn't keep behavioral blocking information.

Hitmanpro and Malwarebytes results after behavioral blocking test:

- **Hitmanpro has found nothing. The suspicious file is not really suspicious because it is set to "ignore" as default and also the file is from Ashampoo.**
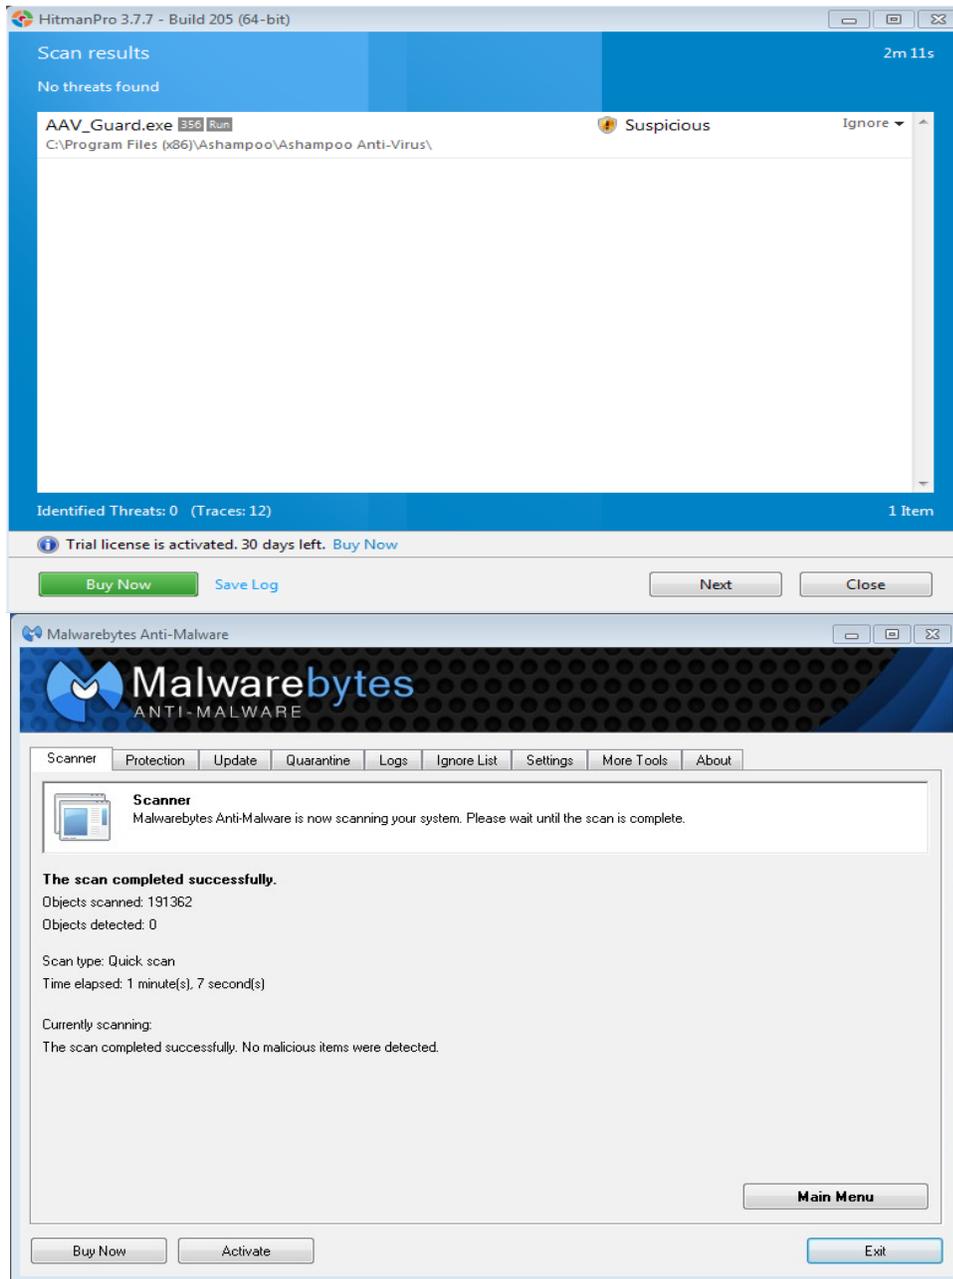

5 Star Rating:

- **1 Star: User-friendly:**   **1/1**
- **1 Star: Low Ram Usage, 60mb or less:**   **0/1**
- **1 Star: 24/30 Web Links, 80%:**   **1/1**
- **1 Star: Detection 85%+:**   **1/1**
- **1 Star: Behavioral Blocking, 50%+:**   **1/1**

                                                      4/5

Summary:

Advantages:

- Nice and cool looking user interface
- Web blocking is amazing
- Detection rate is good
- Behavioral blocking is amazing
- Really quick canning and removal
- Light on system

Disadvantages:

- Really heavy on Ram
- When blocking web links, I wish it blocked it automatically because an average user would probably hit allow, even though it says "Found Infections."

According to my testings, Ashampoo did an amazing job of protecting me. I wish it would lower its ram usage a lot and fix the "block" and "Allow" option to just "Blocking" with out asking. Another thing is that Ashampoo does have a free firewall, but it wouldn't let me install it since it only works in older operating systems which is weird because I have windows 7 in virtualbox, but either way windows firewall is good or comodo firewall. I would recommend this anti-virus to users!

Thanks For Reading!
