Malware Pack Containing 105 Files (1 Day Old Files):

17/105 Files detected = 16.19%

Caught Later By Behavioral Blocking, Firewall, Etc.:

- I only got up to 3 files because the 3rd file was ransomware, i didn't do a screen shot on the whole screen because the rest of it had pornography, so i only did the top part to prove ransomware. F-Prot detected 0 out of 3 files!

Hitmanpro and Malwarebytes results after behavioral blocking test:

- Could not scan with malwarebytes and hitmanpro because of the ransomware that took over my desktop, but of course you can tell F-Prot did not do well!

<u>**5 Star Rating:**</u>

- **1 Star: User-friendly:**   **1/1**

- **1 Star: Low Ram Usage, 60mb or less:**   **0/1**

- **1 Star: 24/30 Web Links, 80%:**   **0/1**

- **1 Star: Detection 85%+:**   **0/1**

- **1 Star: Behavioral Blocking, 50%+:**   **0/1**

                                                1/5

<u>**Summary:**</u>

Advantages:

- Nice and easy user interface

- Really light on system

- Quick scanning and removal

Disadvantages:

- Heavy on ram

- Horrible on web blocking

- Not great detection rate

- Not great behavioral blocking, especially letting a ransomware slip!

According to my testings, F-Prot did not do amazing at all. I do hope they improve before they go out of business. I would definitely not recommend this antivirus to users until they improve the disadvantages.

Thanks for Reading!
