

Malware Security!

Bitdefender Internet Security 2014 (Updated and Default Settings)

User Interface:

The screenshot shows the main dashboard of Bitdefender Internet Security 2014. At the top, a green banner displays the status: "You are currently protected" with subtext "Last scan: never" and "Last update: today". To the right of the banner are navigation buttons for "Events", "Settings", and "Autopilot". Below this is a central area with four main modules: "ANTIVIRUS", "PRIVACY", "FIREWALL", and "UPDATE". Each module has a status indicator (e.g., "Autoscan ON", "Antiphishing ON", "Firewall ON", "Auto Update ON") and a primary action button ("Scan Now", "Configure", "Manage adapters", "Update Now"). A bottom status bar shows "Bitdefender", "30 days left Buy Now", and "Help & Support".

The screenshot shows the "MODULES OVERVIEW" screen in Bitdefender Internet Security 2014. It features a grid of seven modules, each with a status indicator and a settings gear icon: "ANTIVIRUS", "PRIVACY CONTROL", "FIREWALL", "UPDATE", "ANTISPAM", "ID THEFT PROTECTION", "SAFEGO", and "PARENTAL CONTROL". A "WALLET" module is also visible at the bottom left. The bottom status bar is identical to the previous screenshot, showing "Bitdefender", "30 days left Buy Now", and "Help & Support".

Caught Later By Behavioral Blocking, Firewall, Etc.:

- I executed 8 missed files from the malware pack and it detected 5 out of 8.

The computer is still usable, but we will see what Hitmanpro and Malwarebytes say.

Hitmanpro and Malwarebytes results after behavioral blocking test:

HitmanPro 3.7.8 - Build 208 (64-bit) 1m 23s

5 Star Rating:

- 1 Star: User-friendly: 1/1
- 1 Star: Low Ram Usage, 60mb or less: 1/1
- 1 Star: 24/30 Web Links, 80%: 0/1
- 1 Star: Detection 85%+: 0/1
- 1 Star: Behavioral Blocking, 50%+: 1/1

3/5

Advantages and Disadvantages:

Advantages:

- Nice and easy user interface
- Really low ram usage for an internet security suite
- Good behavioral blocker
- Good speed on scanning and removal, not the fastest.

Disadvantages:

- Not so great on web blocking
- Not so great on detection rate
- It does tend to freeze the PC when doing a lot
- When installing bitdefender, it takes quit a while!

Summary:

According to my testing's, Bitdefender did a good job, but not the best. I still would like for them to improve on the disadvantages on there 2015 version. I would rather get there free version with Comodo firewall, instead of paying because there free version is really good.

I still would recommend this Security Suite to users.
